

**Your provider of
choice to connect
West to East**

by Yuri van der Perk

What RETN is about

We provide telecommunication services between Europe and Asia based on our own homogeneous DWDM and IP/MPLS Network Platform, leveraging our in-house technical expertise in building high-bandwidth long-haul networks and data transport solutions.

So... what are we doing in BNIX?

Customer centricity led us to BNIX – our customers were keen to have good **connectivity in Belgium**

It's the best platform in Belgium for **local connectivity** because most of the major ISP's are connected to it

BNIX platform
+
RETN's expansive network
=
Win-win-win for local and international customers

So... what are we doing elsewhere?

WE PAY ATTENTION!

- IPv6 initiative
- New DDoS Mitigation Platform
- 400 G (since 2023 on all Pan-EU network)
- Resilience of the network

What others
think of what
we are doing

Best Pan-European Carrier 2023

Best Central and Eastern
European Wholesale Carrier 2021
